

THE CORPORATE POLICY OF JACOB-GMBH

We combine our tradition as a medium-sized family business with over 100 years of experience with a growth-oriented and innovation-driven corporate culture.

Our mission statement and our vision are the basis of our actions.

We are committed to customer service and the continuous improvement of our environmental performance. We constantly promote quality and environmental awareness among all employees.

We manage our processes systematically with operational and strategic goals and constantly improve them.

All of us are committed to systematically reducing errors to a minimum.

We empower our employees through personal responsibility, support them by setting targets and create open space for innovation.

We manufacture our products and services taking responsibility for our fellow human beings and the environment, complying with the industry's standards, legal regulations plus our own specifications.

We integrate environmental protection, energy efficiency, safety and health into our organization and communicate these to our business partners and other interested parties in an open dialogue.

“The environment is far too important to us to wait for new rules and regulations; we prefer to act proactively. Year after year, we reduce our waste quotas and increasingly use recyclable materials.”
